Visit the Indiana State Library

Everyone is welcome to visit the State Library. Staff are available to assist patrons with their research questions. Librarians with expertise in a variety of fields are on hand to provide guidance and information.

Arrange for a class, club, department, or organization to visit the Indiana State Library. Staff can provide tours geared toward the needs of the group and assist the group in preparing for a research visit.

To arrange a tour or research visit for a group, call 317-232-3699 or email dlipp@library.in.gov

- How many rental units are there in Fort Wayne?
- How much did Indiana export last year?
- What was the educational attainment of the population of my Census tract in 2000?
- What is the projected population of Allen County for 2040?

Cover: Chart showing deaths from consumption, by months, in 31 registration cities. *Tenth Census (1880): Report on the Mortality and Vital Statistics of the United States.*

Who We Are

In 1978, the State Data Center (SDC) Program began as a cooperative agreement between the states and the U.S. Bureau of the Census. State Data Centers assist the Census Bureau by disseminating Census and other federal statistics. The Indiana State Data Center makes the Census and other federal, state, demographic and economic statistics available through a statewide network of affiliates located in state agencies, universities, libraries, local planning agencies, small business development centers, and non-profit organizations.

The Indiana State Data Center Program is comprised of two coordinating agencies: the Indiana State Library and the Indiana Business Research Center at Indiana University's Kelley School of Business (Indianapolis and Bloomington).

What We Do

We provide data and services to all sectors of the community including government agencies, businesses, academia, non-profit organizations, and private citizens. Our products and services are used in marketing, economic development, community planning and analysis, grant writing, business start-ups, and much more.

Workshops are held on accessing and using Census electronic products; private consultations on using data are available as well.

What We Have

We maintain a collection of current and historical statistical resources with emphasis on Census and other federal and state agency statistics. We answer questions regarding demographic and economic statistics using the most current data publicly available through agency internet sites.

Data Available

Examples of data sources we have include:

- Historical Census Publications:
 - The Decennial Census of Population and Housing from 1790 to 2000.
 - Various Economic Censuses and the Census of Agriculture since they began in the 1800s.
- Current and historical data (on the Internet, in book form, microforms, CDs, DVDs.)
- Census maps from the early 1900s through the present.
- Miscellaneous files collected from a variety of sources.
- Data Center web page with links to all kinds of Indiana specific information and data, organized by topic. (URL on back).
